1.3 Maintenance	1

Chapter 1: INTRODUCTION

1.1 Models

This section applies to all available digital plotters given in Volume 1, Section 1.4.3 of this manual.

1.2 Technical Description

A complete technical description of the plotter, including a description of the control logic, is given in the manufacturer's handbook.

1.3 Maintenance

The only engineering maintenance required is the running of the X52 test program; refer Volume 3, Section 3.4.3. The running of this program should be carried out every six weeks.
